PROFESSIONAL SUMMARY

Application Support Specialist with dual, hands-on expertise in Oracle APEX Development and AI Automation Engineering. Built and deployed multiple Oracle APEX applications connected to the Oracle HR Database, including a full HR management system with relational data, interactive dashboards, and dynamic reports. In parallel, designed and deployed live, end-to-end AI-powered automation workflows using n8n — including a fully automated AI video generation pipeline and an AI-powered Telegram customer service agent. Proven ability to write efficient SQL/PL-SQL queries across 20+ operational reports and automate workflows using Excel VBA, cutting manual reporting time by 40%. Background also includes retail and sales leadership, driving measurable revenue and customer satisfaction gains. Actively building at the intersection of database development and AI automation, with the goal of bringing both skill sets to a Junior Oracle APEX Developer or AI Automation role.

KEY COMPETENCIES

Oracle APEX: APEX 24, Interactive Reports, Dashboards, Forms, Page Designer, Navigation Menus, Data Validation

Databases: Oracle SQL, PL/SQL, SQL Developer, HR Schema, Schema Analysis, Constraints, Joins, Subqueries

AI & Automation: n8n Workflow Automation, AI Agents, REST API Integration, AI Video/Voice Generation Tools, Telegram Bot Integration, Third-Party Platform Integrations (Slack, Google Drive, YouTube)

Programming & Scripting: Python (basic), VBA / Excel Macros

Tooling & Documentation: Requirement/Issue Documentation, Knowledge Base Management, Ticketing Systems, Incident Management, Data Validation

Testing: Selenium WebDriver, Software Testing Fundamentals

Currently Learning: Python (advancing beyond basics), REST API integration, JavaScript

TECHNICAL PROJECTS

Oracle APEX Development

HR Management System — Oracle APEX 24+ | Oracle HR Database (OEHR Schema)

- Designed and built a full-stack HR management application in Oracle APEX spanning 8 interconnected pages (Dashboard, Employees, Departments, Jobs, Org Chart, Analytics, Employee Detail, Login), managing 110 employee records across 27 departments and 19 job roles with joined SQL queries for normalized, readable data.
- Implemented an interactive dashboard with animated KPI counters, dynamic bar/pie charts, and real-time headcount/salary analytics using APEX Charts and JavaScript.
- Developed a native org chart (hierarchical Tree region) with drill-down navigation to detailed employee profiles showing job history and direct reports.
- Automated new-hire onboarding with a fully automated n8n workflow (via APEX_WEB_SERVICE, APEX_JSON) that triggers an instant manager notification email on employee creation, eliminating a previously manual step.
- Built custom authentication and role-based authorization, and applied a fully custom CSS theme for a production-quality, responsive UI beyond default Oracle templates.

Student Course Registration System — Oracle APEX 24

- Designed and built a multi-page APEX application to manage student course registrations, capturing student data, course type, and registration date.
- Implemented an Interactive Report enabling dynamic filtering, sorting, searching, and data export for administrative use.
- Documented the data structure and usage guidelines for maintainability and future development.

AI Automation Engineering (n8n)

AI Video Auto-Generation Pipeline — n8n (Live)

- Built a fully automated end-to-end video production workflow triggered by Google Drive uploads (PDF/Excel), extracting content and generating AI scripts, then producing videos via Veo, Runway, Kling, or Flux based on configuration.
- Integrated ElevenLabs for AI voiceover generation, automated SRT subtitle translation, and used Creatomate for final video assembly.
- Implemented a character memory system for consistent AI character appearance across scenes, with auto-upload to YouTube and Google Drive and Slack error/notification logging.

AI-Powered Telegram Customer Service Agent — n8n (Live)

- Built an AI agent integrated with Telegram to handle customer service inquiries automatically, with dynamic AI model selection based on configuration.

- Designed and documented the full workflow logic independently, from requirement definition to live deployment.

AI-Powered Restaurant Order & Inventory Automation — n8n (Live)

- Built an AI agent workflow that receives customer orders, forwards them to the restaurant, and logs each order automatically into a spreadsheet.
- Configured automatic inventory deduction upon order completion, demonstrating rule-based automation and data traceability between systems.

Additional Projects

SQL Reporting Database System — Oracle SQL & PL/SQL

- Created a relational database using Oracle SQL with proper constraints, indexes, and table relationships to store and manage transaction records.
- Wrote custom SQL scripts and PL/SQL procedures to extract specific operational data and ensure data integrity.

Excel VBA Automation & Reporting Tool

- Developed a macro-enabled Excel tool using VBA to automate data cleaning, sorting, and multi-sheet filtering of operational data.
- Integrated with Outlook to auto-distribute formatted reports, cutting manual reporting time by 40%.

PROFESSIONAL EXPERIENCE

Application Support Specialist — Arzak, Adi Micro Finance | Cairo, Egypt

Jan 2025 – Present

- Support and troubleshoot business applications for 300+ internal users, maintaining a 95% SLA achievement rate.
- Run and modify SQL queries in Oracle SQL Developer to extract and validate data across 20+ operational reports, eliminating discrepancies.
- Analyze database tables, access controls, and logs to support engineering teams in troubleshooting application behavior.
- Built Excel VBA automation with Outlook integration to auto-generate and distribute reports, reducing manual time by 40%.
- Document recurring issues and maintain internal knowledge base guides to speed up ticket resolution.

Technical Account Coordinator — Mico World | Cairo, Egypt

Jan 2024 – Jan 2025

- Acted as the technical interface between corporate clients and development teams, gathering and translating feature requirements.
- Tracked deployment timelines and SLAs to ensure delivery quality and traceability of client requests.

Additional Experience

- **Customer Service Representative — HDB Contact Center | Cairo, Egypt** (*Jul 2023 – Jan 2024*): Provided end-user technical support for mobile banking and web portal applications; resolved transaction log discrepancies.
- **Help Desk Support Technician — Tenjaz | Cairo, Egypt** (*Jan 2023 – Jul 2023*): Resolved 50+ daily hardware, OS, and network tickets using ticketing systems and remote support tools.
- **Sales Representative → Retail Store Manager — Orange | Cairo, Egypt** (*Dec 2020 – Jan 2023*): Promoted to Store Manager after 5 months in Sales; grew store revenue by 25% and customer base by 20%.

EDUCATION & CERTIFICATIONS

Bachelor of Arts in Archaeology — Ain Shams University | Cairo, Egypt

Graduated 2020

Certifications

Databases & SQL: Oracle SQL Developing Certification – Udemy; SQL (Intermediate) – HackerRank; SQL (Basic) – HackerRank

AI: Introduction to AI for Everyone – ITIDA; AI Career Essentials – United Latino Students Association

Testing: Selenium WebDriver: From Foundation to Framework – Udemy; Introduction to Software Testing Concepts & Techniques – Maharatech

Professional Development: Leadership Skills Certification – Edraak; CCNA Training Coursework Completion
